NUMWORKS

NumWorks NC Exam Mode

Note: the operating system must be greater than or equal to 22.2.0

NumWorks has a special mode that students and teachers can initiate to prepare a calculator for testing in North Carolina. This feature is called "**NC exam mode**". This feature temporarily disables specific applications and features. It also clears all memory, data, and unofficial applications .

1. Navigate to the last application, **Settings**.

Before testing - Enabling NC exam mode
